

Is vaccination against COVID-19 a good idea?

Absolutely! Here are 4 good reasons why.

1. Vaccination **saves lives**.
2. The vaccines have been subjected to all the standard quality control checks, so they really are very **safe**.
3. **You will be protecting yourself, your loved ones and your colleagues**. In order to keep the virus down, it is best to vaccinate everyone (currently over 12 years of age).
4. We all want to be able to **get back together**, to cuddle and enjoy each others company. This is only possible if we slow the spread of the virus.

Still in doubt?

Talk to a doctor (your GP or an occupational physician).
