

COVID-19 is a nasty beast, give your resistance a **BOOST!**

Why is additional vaccination necessary?

1. Vaccine protection decreases over time.
With a booster dose, you are **protected even better and longer** than before.
2. A vaccine **protects you and others** against serious illness and hospitalisation.
3. A booster vaccination is **also sensible after you have been infected**.

You will soon receive an invitation via mail or post.

Still in doubt?

Talk it over with your family doctor
or your occupational physician.
